REMOW

Professional finishing lawn mower

Technical features

Frame	Domex steel, bent and welded by robot.
Dimensions	105 cm working width.
Drive	Electric motor.
Transmission	2 belt transmission.
Rotor	Horizontal rotor with interchangeable Y-knives.
	3000 rpm.
Settings	Adjustable cutting height in 6 positions from 3 to 8 cm.

The finishing mower has 3 blades driven by an electric motor connected to a 2-belt transmission. It combines efficiency and professional cutting quality. Cutting height can be adjusted from 2 to 9 cm and a mulching kit can be installed to obtain a professional result with no residue. It is specifically used in parks, golf courses, private and public gardens.
