Hose	10m hose - lance with nozzle.
Tank	Detergent tank.
Weight	50 kg.

200L rear tank with function on request of spraying group (REATOM)

The REIDRO professional pressure washer is ideal for carrying out all the operations that require a powerful and adjustable water jet being able to adapt it to all work needs. The pressu- re washer can be powered by a tank mounted on the **RINO®** box or by direct connection to a low pressure water line. As an option it can be equipped with an automatic and adju- stable detergent tank. It provides good autonomy results thanks to its low energy demand (over 8 hours).
