Rotors	Rotors with interchange- able blades.
	Rotor speed 3200 rpm.
Settings	Adjustable cut height from 2 to 9 cm | 4 pivoting wheels with shims to adjust the cutting height.
Weight	215 kg.

The finishing mower has 3 blades driven by a 2-belts transmission, to achieve perfect grass cutting even on large surfaces. It combines professional effectiveness and cutting quality. Its floating category 0 attachment ensures perfect tillage on uneven ground with the possibility to adjust the cutting height from 2 to 9 cm with the possibility of instal-ling a mulching kit to make a zero residues cut. Particularly used on parks, golf courses, private and municipal gardens.
