RESPAZ

Professional Sweeper

Technical Data

Frame	Domex steel, bent and welded by robot.
Connection	Quick attach category 0.
Dimensions	Total width 150 cm | Working width 120 cm.
Power	Electric motor.
Power Train	By chain.
Rotors	Rotor with nylon brushes with a diameter of 400 mm.
	Rotor speed 160 rpm.
Settings	Mechanically adjustable in 3 positions, electric lifting and unloading by joystick.
Weight	190 kg.

The electric sweepeer machine consists of a horizontal axe with nylon brushes, powered by an electric motor with chain drive. The collector (optional) is equipped with an electric cylinder that allows the opening (discharge of the collected material) and closing. It can be used at any time of the year, thanks to the enormous versatility and easy to use in the various cleaning operations: collection of materials on pubblic areas, roads, pedestrian, cycle paths and on parking lots.
